

“When the school does not go to the museum,
the museum goes to the school “

Following the exhibition “Myrtis: Face to Face with the Past” in the museums of Greece and abroad, the educational programs that the museologists, Popi Georgopoulou and Athina Rigatou have worked out, develop the connection between museum and school in a new way.

Our educational team aims at:

- The acquaintance and familiarization of pupils with concepts such as museum, history, archaeology, medicine and others, through educational programs and educational-kits.

- The participation of pupils in various research teams, and

- A different form of conveying knowledge – from one pupil to the other.

In this place of Myrtis’ site you will find all activities related with Myrtis, in schools of Greece and abroad.
